"There aren't a lot of local grocery options in Chinatown (the best Chinese produce store Ai Hoa moved away last year) so I'm extremely excited for this weekly market!"

"Please make sure there are accommodations for ample recycling and compost services for the vendors and participants."

"Thank you for conducting this survey! I think it's really important to make this an inclusive market - very welcoming for all, but the elderly Asian community in particular."

"I'd love to hear more about how community members and vendors in Chinatown will be consulted and included. It seems these efforts, while valiant, largely cater to a white, gentrified Los Angeles audience. I think it's important that the Chinatown community plays a key role in this venture."
